

# LITHONIA OUTDOOR ARCHITECTURAL SCENCE

## WSTM

MINI-TRAPEZOID

Lithonia Lighting's Architectural Sconce Series expands its offering with the introduction of another classic shape - the WSTM. The Mini-Trapezoid offers an additional element of versatility to the popular product line as a second housing size for the classic trapezoid shape.

Precisely engineered to accommodate up to 70-watt metal halide and high pressure sodium HID lamps, as well as compact fluorescent sources, the Mini-Trapezoid offers another versatile option for decorative lighting. With a Nighttime Friendly™ distribution available in the lens down oriented optic, this decorative sconce brings another element of size, performance, IES full cutoff and emergency egress options to the popular line where function meets design.

The WSTM follows the familiar characteristics found in the Architectural Sconce Series - quality construction, IP65 rating, easy installation and maintenance, and color options in a variety of standard textured finishes.

### AESTHETICS:

- **Smaller Classic Trapezoid Shape** - complements a variety of building architectures where a smaller sconce may be required
- **Accent Reveals** - provide an opportunity for customization using striping
- **Standard Textured, Dark Bronze Polyester Powder Finish** - other architectural color choices are available

### PERFORMANCE:

- **Premium Optical Performance** - segmented reflector provides uniformity and control
- **Medium Throw Distribution (MD)**
- **Nighttime Friendly™ Optic** - provides full cutoff lighting when the fixture is mounted in the lens down orientation
- **Emergency Lighting Options** - offer choice of emergency circuit 120-volt (EC) or emergency circuit 12-volt (DC12, DC2012)

### CONSTRUCTION:

- **IP65 Rated** - in both lens up and lens down orientations
- **Premium Construction** - die-cast aluminum housing and door frame
- **Wattage Versatility** - one housing size accommodates HID wattages up to 70-watt metal halide and high pressure sodium, as well as 42-watt TRT compact fluorescent lamps
- **Easy to Install** - simple mounting strap design allows for easy, one-person installation
