

LITHONIA OUTDOOR ARCHITECTURAL SCONCE

PRECISION BEAM OPTION - WSR

The popular Half-Round Sconce in Lithonia Lighting's Architectural Sconce Series now illuminates with a Precision Beam option. This artistic feature allows flexibility in specialty light patterns with the choice of five color options and two beam distribution patterns.

The WSR Precision Beam enhances many architectural environments with a choice of a tight pencil beam pattern or a broader column spread in your choice of field - interchangeable white, red, blue, green or yellow colors. Available with the Wide Throw downlight optic, the beam can be mounted in either the lens up or lens down orientation to achieve a variety of colorful and dramatic lighting effects.

The WSR Precision Beam option is available with all existing WSR options and accessories, further expanding the versatility found in the popular Architectural Sconce Series.

AESTHETICS:

- Classic Half-Round Shape
- 5 Color Options in Pencil Beam Pattern (Red, Green, Blue, Yellow and White)
- 5 Color Options in Column Beam Pattern (Red, Green, Blue, Yellow and White)

PERFORMANCE:

- Premium Optical Performance - segmented reflectors provide uniformity and control
- Two Beam Options - available with Wide Throw (WT) Downlight Distribution
- Lens Up or Lens Down Orientation - positions precision beam either above or below luminaire

INSTALLATION:

- Easy to Install
- Bubble Level - provides correct alignment
- Multiple Options - available with all existing WSR options/accessories
- Colors are Field Interchangeable - offers flexibility in color light accents
