

RT5D

recessed volumetric downlighting

FREQUENTLY ASKED QUESTIONS

Q: What is RT5D?

A: RT5D is the latest addition to the RT5™ volumetric family. A one-lamp, triple-tube downlight that offers optional dimming and emergency capabilities, this 1' x 1' unit is designed for transitional spaces that require an aesthetically pleasing fixture with a spacious light output.

Q: Is RT5D rated for IC installations?

A: RT5D is rated for non-IC installations only, where no insulation is to be placed over top or within 3" (76mm) of the sides of the rough-in section.

Q: Can the RT5D be installed in outside soffits?

A: The RT5D is UL listed for damp locations only and we would not recommend installation in outside applications.

Q: Can the reflector be offered in paint finishes beyond white?

A: Yes. Please use our RFD process.

Q: What is the maximum ceiling thickness?

A: 2".

Q: Is RT5D available for use with one 57TRT lamp?

A: No, not at this time. We recommend 1/32TRT but have the ability to receive 1/26TRT and 1/42TRT.
